PROFILE

Quality engineer who turns complex releases into confident decisions. 7+ years of experience across payment systems, transaction processing, financial market infrastructure, and data migration. Combines hands-on functional, integration, API, backend, regression, and UAT expertise with automation in Python, VBA, and Power Automate. Trusted to reconcile migration data, coordinate defect triage, and support evidence-based go-live approval.

PROFESSIONAL EXPERIENCE

Senior Quality Assurance Engineer

Jul 2022 - Sep 2025

Nagarro Software Pvt. Ltd. | Noida, India

- Owned end-to-end QA and risk-based execution across financial market infrastructure and transaction-processing platforms.
- Led functional, integration, regression, and UAT validation for payment-messaging systems, including ISO 20 022 requirements.
- Protected migration and cutover readiness through pre/post-migration data reconciliation and backend verification using SQL and Python.
- Built Python, VBA, and Power Automate utilities that reduced manual execution effort by 60% and automated test-evidence compilation.
- Improved defect-detection efficiency by 45% by strengthening QA coverage, traceability, and risk-focused execution.
- Coordinated defect triage with business representatives, developers, and external providers; supported evidence-based go-live approval.

Technical Analyst - QA

May 2021 - Jun 2022

Cognizant Technology Solutions Pvt. Ltd. | Noida, India

- Delivered quality engineering, integration testing, and API verification for enterprise payment gateways and transaction engines.
- Validated new features against functional requirements, contributing to zero high-severity defect leakage.
- Tested REST APIs with Postman and verified transaction updates in Oracle, PostgreSQL, and MS SQL databases.
- Automated metric reporting and change-request documentation with lightweight VBA and Python utilities.
- Worked across Agile teams with business partners, suppliers, and service providers to support UAT.

Software Engineer - QA Analyst

Apr 2018 - Apr 2021

Infosys Pvt. Ltd. | Hyderabad, India

- Executed functional, integration, and backend testing across data-driven financial software systems.
- Designed and maintained test plans, cases, execution evidence, and defect records in HP ALM and TestRail.
- Performed SQL-based data reconciliation to verify consistency and business-rule compliance.

CORE EXPERTISE

QUALITY LEADERSHIP	Risk-based testing Release readiness Defect triage UAT Audit evidence
AUTOMATION & APIS	Python Playwright Selenium Java VBA Power Automate Postman
DATA & PLATFORMS	SQL Oracle PL/SQL PostgreSQL MS SQL Snowflake Power BI
PAYMENTS DOMAIN	Payment systems Transaction processing SEPA Target2/T2S ISO 20 022 Banking
DELIVERY TOOLS	JIRA TestRail HP ALM Agile/Scrum Functional specifications Change management

FLAGSHIP PROJECT | CRITICAL PAYMENT-SYSTEM MIGRATION

Context: Supported a high-stakes migration within a financial market infrastructure environment. Client and project identifiers are intentionally anonymized.

- Reconciled pre- and post-migration records with SQL and Python to identify material data inconsistencies before go-live.
- Led evidence-driven defect triage across business representatives, developers, and external service providers, ensuring clear ownership and resolution paths.
- Supported go-live readiness and final approval by making unresolved risks visible, traceable, and understandable to decision-makers.
- Helped prevent a serious defect from reaching production through disciplined backend validation, stakeholder coordination, and release gating.

LEADERSHIP APPROACH

Connect the defect to the decision. I translate technical evidence into clear release risk, align cross-functional teams around what must happen next, and improve repeatability through pragmatic automation rather than automation for its own sake.

EDUCATION & LANGUAGES

Bachelor of Technology, Computer Science and Engineering | Meerut Institute of Engineering and Technology (MIET), India | 2012-2016

Languages: English (C2) | German (A2)

Current status: Relocated to Düsseldorf and actively pursuing Senior QA, Test Automation, and QA Lead opportunities.
